COURSE OVERVIEW

Organizations require strong business process optimization capability to remain competitive, control costs, manage risk, and deliver sustainable operational and commercial value.

This in-house program develops practical business process optimization capability through structured frameworks, applied tools, case studies, and improvement methods relevant to modern organizations.

Business Challenges Addressed

- > Inconsistent processes and performance
- > Limited governance and accountability
- > Rising operational and commercial costs
- > Weak planning and coordination
- > Performance visibility limitations
- > Inefficient workflows and controls
- > Stakeholder alignment challenges
- > Risk and compliance exposure
- > Limited measurement and reporting
- > Difficulty sustaining improvement

Key Learning Outcomes

- > Understand business process optimization principles and frameworks
- > Improve business process optimization processes
- > Identify performance risks and improvement gaps
- > Apply structured analysis and decision-making tools
- > Strengthen governance and accountability
- > Improve coordination and stakeholder alignment
- > Develop meaningful performance indicators
- > Support data-driven decision-making
- > Improve operational and commercial outcomes
- > Create sustainable improvement systems

WHO SHOULD ATTEND

Operations Managers

Department Managers

Production Managers

Supervisors & Team
Leaders

Process Improvement

Continuous Improvement

Quality Managers

Business Analysts

Operational Excellence

Performance Personnel

TRAINING METHODOLOGY

Interactive learning approaches support practical application and can be customized to the organization's environment, industry, and participant experience.

ID

Instructor-Led Discussions

ICS

Industry Case Studies

PW
