COURSE OVERVIEW

Organizations require strong operational excellence & continuous improvement capability to remain competitive, control costs, manage risk, and deliver sustainable operational and commercial value.

This in-house program develops practical operational excellence & continuous improvement capability through structured frameworks, applied tools, case studies, and improvement methods relevant to modern organizations.

Business Challenges Addressed

- > Inconsistent processes and performance
- > Limited governance and accountability
- > Rising operational and commercial costs
- > Weak planning and coordination
- > Performance visibility limitations
- > Inefficient workflows and controls
- > Stakeholder alignment challenges
- > Risk and compliance exposure
- > Limited measurement and reporting
- > Difficulty sustaining improvement

Key Learning Outcomes

- > Understand operational excellence & continuous improvement principles and frameworks
- > Improve operational excellence & continuous improvement processes
- > Identify performance risks and improvement gaps
- > Apply structured analysis and decision-making tools
- > Strengthen governance and accountability
- > Improve coordination and stakeholder alignment
- > Develop meaningful performance indicators
- > Support data-driven decision-making
- > Improve operational and commercial outcomes
- > Create sustainable improvement systems

WHO SHOULD ATTEND

Operations Managers

Department Managers

Production Managers

Supervisors & Team
Leaders

Process Improvement

Continuous Improvement

Quality Managers

Business Analysts

Operational Excellence

Performance Personnel
