COURSE OVERVIEW

Global supply chains face growing disruption exposure driven by geopolitical instability, economic uncertainty, supplier dependency, transportation bottlenecks, cyber risks, and regulatory changes. This in-house training program helps organizations strengthen supply chain resilience strategies, improve risk identification capabilities, and enhance operational continuity planning in complex business environments. Participants explore practical approaches to managing vulnerabilities, assessing disruption exposure, improving supplier risk visibility, and building more resilient operational frameworks.

BUSINESS CHALLENGES ADDRESSED

- Supply chain disruption exposure
- Supplier dependency & concentration risks
- Inventory volatility & lead-time uncertainty
- Operational continuity planning gaps
- Lack of supply chain visibility
- Global sourcing vulnerabilities
- Risk identification & mitigation gaps
- Crisis response coordination challenges
- Cost versus resilience balancing pressures

KEY LEARNING OUTCOMES

- Identify key supply chain risks & vulnerabilities
- Evaluate supply chain resilience maturity
- Improve supplier risk assessment & monitoring
- Develop operational continuity & response strategies
- Strengthen visibility & risk reporting processes
- Analyse disruption & operational performance impact
- Improve crisis response coordination
- Implement practical resilience frameworks
- Align resilience planning with operational priorities

WHO SHOULD ATTEND

Supply Chain Managers · Procurement Managers · Logistics Managers · Operations Managers · Warehouse & Distribution Professionals · Supplier Management Teams · Planning & Forecasting Professionals · Business Continuity Personnel · Risk Management Professionals

COURSE MODULES

01 Supply Chain Resilience Fundamentals

- Understanding modern supply chain disruption environments
- Key principles of supply chain resilience
- Global and regional disruption trends
- Operational impact of supply chain instability
- Resilience versus efficiency trade-offs

02 Supply Chain Risk Identification & Assessment

- Types of supply chain risks
- Internal versus external disruption factors
- Supplier concentration and dependency risks
- Risk mapping techniques
- Supply chain vulnerability assessment frameworks

03 Supplier Risk & Vendor Resilience Management

- Supplier evaluation and monitoring strategies
- Vendor risk assessment methodologies
- Third-party risk visibility
- Supplier diversification approaches
- Strengthening supplier collaboration and resilience

04 Inventory, Logistics & Operational Continuity

- Inventory resilience strategies
- Buffer stock versus lean operations
- Transportation and logistics risk considerations
- Continuity planning for critical supply operations
- Managing lead-time uncertainty

05 Crisis Management & Disruption Response

- Supply chain disruption response planning
- Evaluation and communication frameworks
- Cross-functional coordination during disruptions
- Decision-making under operational pressure
- Incident response best practices

06 Supply Chain Visibility & Performance Monitoring

- Supply chain visibility principles
- Risk monitoring indicators and metrics
- Operational resilience KPIs
- Early warning indicators
- Reporting and escalation processes

07 Building Long-Term Supply Chain Resilience

- Embedding resilience into operational strategy
- Organisational resilience culture
- Governance and accountability structures
- Continuous improvement approaches
- Future resilience planning considerations

TRAINING METHODOLOGY

■ Instructor-Led Discussions

■ Industry Case Studies

■ Practical Exercises

■ Group Workshops

■ Scenario Analysis

■ Risk Mapping Activities

■ Resilience Discussions

■ Team Engagement Sessions

IN-HOUSE DELIVERY OPTIONS

- Onsite at client premises
- Live virtual instructor-led format
- Hybrid delivery format
- Customized duration based on requirements

INDUSTRIES WE SERVE

Oil & Gas · Manufacturing
